Software Engineer | Fullstack Developer | I am a passionate and results-driven Software Engineer with 2 years of hands-on experience in developing full-stack applications using the MEAN and MERN stack. I have successfully built and deployed several web applications from scratch, including internal tools, dashboards, and business-oriented systems that improve efficiency and user experience. I am experienced in designing RESTful APIs, integrating third-party services, and optimizing application performance. I enjoy solving problems, writing clean and scalable code, and continuously learning new technologies to deliver impactful solutions.
